CONTENTS

Volume 24, Issue Nos. 1–15

International Journal for

NUMERICAL AND ANALYTICAL METHODS
IN GEOMECHANICS

Issue No. 1, January 2000

A Rational Method for Development of Limit State for Liquefaction Evaluation Based on Shear Wave Velocity Measurements: C. H. Juang and C. J. Chen 1

A Symmetrical Streamline Stabilization Scheme for High Advective Transport: E. Wendland and G. Schmid 29

Numerical Modelling of Competitive Components Transport with Non-linear Adsorption: D. Sheng and D. W. Smith 47

Use of Coupled Finite Element Analysis in Unsaturated Soil Problems: A. K. L. Ng and J. C. Small 73

BOOK REVIEW
Sliding Friction, Physical Principles and Applications, by Bo N. J. Persson 95

CONFERENCE DIARY 97

ANNOUNCEMENT 99

Issue No. 2, February 2000

On the Volumetric Deformation of Reconstituted Soils: M. D. Liu and J. P. Carter . . 101

Visco-elastic Load Transfer Models for Axially Loaded Piles: W.-D. Guo 135

New Bounds for the Height Limit of a Vertical Slope: J. Pastor, T.-H. Thai and P. Francescato 165

Elasto-plastic Modelling of Stress-path-dependent Behaviour of Interfaces: K. Fakharian and E. Evgin 183

Tunnel Reinforcement via Topology Optimization: L. Yin, W. Yang and T. Guo . . . 201

CONFERENCE DIARY 215

CONTENTS LISTING 217

Issue No. 3, March 2000

Contaminant Transport with Non-equilibrium Processes in Unsaturated Soils and Implicit Characteristic Galerkin Scheme: X. Li, W. Wu and S. Cescotto 219

Nonlinear Analysis of Shear Band Formation in Sand: W. Wu 245

Pressure-dependent Elastic Moduli of Granular Assemblies: C. L. Liao, T. C. Chan, A. S. J. Suiker and C. S. Chang 265

Settlement-time Behaviour of Granular Embankments: J. L. Justo and P. Durand . . 281

Prediction of the Initial Normal Stress in Piles and Anchors Constructed using Expansive Cements: C. M. Haberfield 305

ERRATUM
'The reflection and transmission of shear waves in monoclinic media', *Int. J. Numer. Anal. Meth. Geomech.* **21**, 495–504 (1997): A. Chattopadhyay, S. Saha and M. Chakraborty 327

CONFERENCE DIARY 331

CONTENTS LISTING 335

Issue No. 4, 10 April 2000

Finite Element Consolidation Analysis of Soils with Vertical Drain: G. Zhu and J.-H. Yin 337

FEM Validation of a Double Porosity Elastic Model for Consolidation of Structurally Complex Clayey Soils: C. Callari and F. Federico 367

Experiment and Validation of Numerical Simulation of Coupled Thermal, Hydraulic and Mechanical Behavior in the Engineered Buffer Materials: M. Chijimatsu, T. Fujita, A. Kobayashi and M. Nakano 403

Optimization of Reinforced Soil Embankments by Genetic Algorithm: P. Ponterosso and D. St. J. Fox 425

CONFERENCE DIARY 435

Issue No. 5, 25 April 2000

Virtual Geotechnical Laboratory Experiments Using a Simulator: D. Penumadu, R. Zhao and D. Frost 439

Coupled Computations for an Elastic–Perfectly Plastic Soil Using Adaptive Mesh Refinement: M. A. Hicks 453

Extending the Strain Path Method Analogy for Modelling Penetrometer Installation: D. R. Gill and B. M. Lehane 477

Elastic Visco-plastic Consolidation Modelling of Clay Foundation at Berthierville Test Embankment: G. Zhu and J.-H. Yin 491

Load–Deflection Response of Transversely Isotropic Piles Under Lateral Loads: J. Han and J. D. Frost 509

CONFERENCE DIARY 531

Issue No. 6, May 2000

Extrusion Movements of a Tunnel Head Reinforced by Finite Length Bolts—a Closed Form Solution Using Homogenization Approach: H. K. K. Wong, D. Subrin and D. Dias 533

Rigid Body Rotation and Block Internal Discretization in DDA Analysis: Y. M. Cheng and Y. H. Zhang 567

Accelerated Initial Stiffness Schemes for Elastoplasticity: S. W. Sloan, D. Sheng and A. J. Abbo 579

Implementation of DSC Model and Application for Analysis of Field Pile Tests Under Cyclic Loading: C. Shao and C. S. Desai 601

CONFERENCE DIARY 625

Issue No. 7, June 2000

Performance of Displacement Finite Elements for Modelling Incompressible Materials: H. S. Yu and M. D. Netherton 627

A Simple Model to Predict the Effect of Volume Fraction, Diameter, and Length of Fibres on Strength of Fibre Reinforced Brittle Matrix Composites: T. Kundu, H. S. Jang, Y. H. Cha and C. S. Desai 655

CONFERENCE DIARY 675

Issue No. 8, July 2000

Stresses from Linearly Distributed Pressures over Rectangular Areas: H. M. Algin . 681

One-dimensional Contaminant Transport Through a Deforming Porous Medium: Theory and a Solution for a Quasi-steady-state Problem: D. W. Smith 693

Analysis of the Compression of Structured Soils using the Disturbed State Concept: M. D. Liu, J. P. Carter, C. S. Desai and K. J. Xu 723

CONFERENCE DIARY 737

Issue No. 9, 10 August 2000

Consolidation by Vertical Drains under Time-dependent Loading: X.-W. Tang and K. Onitsuka 739

Kinematic Hardening Plasticity Formulation of Small Strain Behaviour of Soils: A. M. Puzrin and J. B. Burland 753

Topology Optimization to Prevent Tunnel Heaves under Different Stress Biaxialities: L. Yin and W. Yang 783

BOOK REVIEW
Geomechanics and Fluidodynamics with Applications to Reservoir Engineering, by V. N. Nikolaevskiy, Reviewed by S. M. Aleynikov 793

Issue No. 10, 25 August 2000

A Superposition Scheme to Obtain Fundamental Boundary Element Solutions in Multi-layered Elastic Media: K.-J. Shou 795

A Naturally Efficient Numerical Technique for Porous Convection Stability with Non-trivial Boundary Conditions: L. E. Payne and B. Straughan 815

An Averaging Procedure for Layered Materials: A. Niemunis, C. Karcher and T. Theile 837

Issue No. 11, September 2000

Numerical Modelling of Shear Socketed Piers: A. Khan 853

Effect of Wave Non-linearity on the Standing-wave-induced Seabed Response: C. P. Tsai, T. L. Lee and J. R. C. Hsu 869

A Three-phase Model for Unsaturated Soils: B. Loret and N. Khalili 893

BOOK REVIEW
Computational Stochastic Mechanics, Proceedings of the Third International Conference on Computational Stochastic Mechanics, Edited by R. D. Spanos, Reviewed by J. T. Christian 929

Issue No. 12, October 2000

Simulating the Membrane Contact Patterns of Triaxial Sand Specimens: D. R. Saussus and J. D. Frost 931

Interaction between a Circular Opening and Fractures Originating from its Boundary in a Piecewise Homogeneous Plane: S. G. Mogilevskaya, L. Rothenberg and M. B. Dusseault 947

Cylindrical Cavities and Classical Rat-hole Theory Occurring in Bulk Materials: J. M. Hill and G. M. Cox 971

Issue No. 13, November 2000

A Semi-empirical Method for the Liquefaction Analysis of Offshore Foundations: H. A. Taiebat and J. P. Carter 991

Explanation of Locking of Four-node Plane Element by Considering it as Elastic Dirichlet-type Boundary Value Problem: F. Molenkamp, J. B. Sellmeijer, C. B. Sharma and E. B. Lewis 1013

Issue No. 14, 10 December 2000

Fractal Approach Applied to Calculate Hour-glass Eigenvalue of Elastic Square 4-node Quad: F. Molenkamp, E. B. Lewis, C. B. Sharma and J. B. Sellmeijer 1049

Effective KEM Solutions for the Limit Load and the Slope Stability Problem: P. Gussmann 1061

Numerical Modelling of Large Deformations Associated with Driving or Open-ended Piles: D. S. Liyanapathirana, A. J. Deeks and M. F. Randolph 1079

LETTER TO THE EDITOR
Finite Element Analysis of Reinforced Embankment Foundation: C. Ghosh 1103

AUTHOR'S REPLY
A. Varadarajan 1105

BOOK REVIEW
The Finite Element Method in the Static and Dynamic Deformation and Consolidation of Porous Media: R. W. Lewis and B. A. Schrefler; Reviewed by H. R. Thomas . . 1107

Issue No. 15, 25 December 2000

General Elastic Analysis of Piles and Pile Groups: K. J. Xu and H. G. Poulos 1109

Poroelastic Behaviour of Saturated Brittle Rock with Anisotropic Damage: M. Bart, J. F. Shao and D. Lydzba 1139

ERRATUM
Settlement-time behaviour of granular embankments, by J. L. Justo and P. Durand . 1155
